ABOUT ME

Degree-qualified Software Engineer (B.Sc. Hons in Computing & Information Systems) offering nearly two years of intensive commercial experience engineering scalable full-stack applications. Highly proficient in architecting robust backends using Java and MVC frameworks, paired with building dynamic, responsive user interfaces utilizing React.js and Next.js. I possess a strong hands-on background managing enterprise relational databases (MySQL) and executing seamless cloud deployments. Backed by a formal certification in Software Quality Assurance (SQA), I bring a strict, zero-defect discipline to software development best practices, ensuring clean, maintainable code. I am a proactive self-starter and problem-solver, eager to drive high-performance product development within fast-paced engineering teams.

WORK EXPERIENCE

Associate Software Engineer

03/2025 – Present

Affno Asia Pacific Pvt Ltd

- Designed and developed enterprise-grade FinTech applications for a leading commercial bank using React.js and Redux for efficient state management.
- Built RESTful APIs and CMS-driven systems with Node.js and MySQL databases.
- Integrated authentication, authorization, and secure data flows for production-ready applications.
- Deployed and managed applications using Docker and AWS Cloud, ensuring scalability and reliability.
- Automated development and deployment pipelines using CI/CD practices for faster delivery cycles.
- Collaborated in Agile teams, contributing to architecture discussions, code reviews, and production releases.
- Documented technical designs, workflows, and processes to support team knowledge sharing.

Intern Software Engineer

08/2024 – 03/2025

Affno Asia Pacific Pvt Ltd

- Developed front-end applications using React.js with Redux and built back-end APIs using Node.js and Express.js.
- Designed and managed MySQL databases using Prisma ORM for efficient data handling.
- Deployed and maintained applications on AWS with CI/CD pipelines to automate development workflows.
- Worked in Agile teams and documented technical specifications and processes using Confluence.

EDUCATION

B.Sc (Hons) in Computing & Information Systems

08/2021 – 04/2026

Sabaragamuwa University of Sri Lanka

I have completed all the academic requirements of my degree program in the Department of Computing and Information Systems, Faculty of Computing.

Secondary Education

2010 – 2018

Ananda Sastralaya, Mathugama

- G.C.E. Advanced Level (A/L) - 2019: Passed in the Physical Science stream with Chemistry (B), Physics (C), and Combined Mathematics (C).
- G.C.E. Ordinary Level (O/L) - 2015: Passed with 9 'A' passes, including Mathematics and English.

TECHNICAL SKILLS

React.js	MySQL	Next.js	Python	Node.js	TypeScript	AWS	Azure
CI/CD	ASP.NET	Spring Boot	Agentic AI Generative - AI		GitHub	Docker	
MSSQL Server	PostgreSQL	ML & Research		OOAD	AI-Accelerated Engineering		

CERTIFICATES

Certificate Of Completion Microservices Foundations

Focused on the principles of designing, deploying, and maintaining scalable microservices architectures.

Certificate Of Completion - Generative AI Working with Large Language Models

Applied training in Natural Language Processing (NLP) and integrating LLMs into software solutions.

Software Quality Assurance BootCamp - FSD Academy

Comprehensive training covering the Software Development Life Cycle (SDLC), quality management, and manual testing workflows.

PROJECTS

Celebrateit

React | Express | MongoDB | Node.js

Designed and developed a full stack e-commerce platform for gifts, flowers, and cakes using modern web technologies, featuring user authentication, product and inventory management, shopping cart functionality, secure online payments, and an admin panel for order and content management.

Research Project in IS - Wine Quality Predictor

python | sklearn | RandomForestClassifier

Designed and evaluated hybrid ensemble machine learning models with interpretable feature engineering to accurately predict white wine quality using real world datasets, improving model performance and explainability. This research was published at ComURS 2026 and It awarded as the Best Paper under the Information Systems Track.

Smart SME Management System

Next.js | MSSQL | TypeScript | Azure | Prisma | GenAI

Developed a full-stack ERP system for small businesses to centralize HR, inventory, POS, and financial tracking. Built with Next.js 16 and Recharts for analytics, featuring role-based authentication and integrated AI SDKs for smart business insights. SmartSME 

FlowDesk Task Board API

ASP.NET | EF Core | Layered Architecture | SQL

Designed and developed a RESTful ASP.NET Core API for task management with CRUD, workflow transitions, EF Core data modeling, validation, filtering, clean architecture, dependency injection, error handling, and optional pagination, logging, and deployment.

Hello-Doc

React | Express | MongoDB | Node.js

Hello-Doc is a healthcare web application that allows users to book doctor appointments, manage health records, and access medical services online. It focuses on improving patient-doctor interaction by providing an easy-to-use interface, secure record management, and appointment scheduling.

OTHER SKILLS

- | | |
|--|-------------------------------------|
| • Leadership & Team work | • Flexibility and fast learning |
| • Collaboration and Team Coordination | • Communication skills |
| • Decision making and problem-solving skills | • Accountability and Responsibility |

EXTRA CURRICULAR ACTIVITIES

IEEE Student Branch | SUSL

Active Member

Society of Computer Science | SUSL

Active Member
